## **SEPTEMBER 2021 – Flu Vaccination Clinics**

We will be delivering flu vaccination clinics throughout September - November this year for patients aged 70 years and over & those identified as clinically extremely vulnerable (this does not include some patients under 65 years who would normally receive their flu vaccination at the practice).

We will only be supplied with the vaccine stock for these patients.

We will be in contact with all patients noted above in due course - please be patient as we have over 600 patients identified to book into our clinics.

All other patients, including those under 65 years with a pre-existing condition who would normally receive their vaccination at the practice, will receive a letter inviting them to get their flu vaccination at a central clinic.

The arrangements this year are a little different than 'normal' and are the same arrangements for all general practices across Tayside.

COVID Booster vaccinations will not be offered at the practice and all patients eligible will receive a letter in due course inviting them to attend a central clinic - again, this is the arrangement across Tayside.
